
Snow Plough

Gaoyuan snow plough, which is mounted on the front of the truck, can shovel the snow cover and compacted snow away directly. Due to its reliability, durability and easy operation, our snow plough is widely used for snow removal of high grade highways, urban roads, pavement of square and scenic spots.

Generally, our snow plough consists of rubber blade, main frame, connecting arm, mounting rack, support wheels, keeping wheels, working lights, hydraulic system and electric system.

Main Technical Specifications

Snow Plough YDPL0524

Model	YDPL0524
Applied truck	5 ton load truck
Power supply	independent hydraulic power unit
Size of plough blade	2400×1000mm
Plough width	2100□2400mm
Total weight	430kg
Max. working speed	60km/h
Deflection angle to L/R	±30°
Automatic leveling angle	±5°

Snow Plough YDPL1532

Model	YDPL1532
Applied truck	8ton/15ton load truck
Power supply	independent hydraulic power unit
Size of plough blade	3320×2080×1870mm
Plough width	2800□3200mm
Total weight	960kg
Max. working speed	60km/h
Deflection angle to L/R	±30°
Automatic leveling angle	±5°

We at Gaoyuan are not only a snow plough maker, but also a manufacturer of asphalt distributor, synchronous chip sealer and asphalt plant. Our products are CE, CCC compliant, and are very popular with customers from Poland, Russia, Nigeria, Angola, Congo, Uganda, Mali, among other countries. To ensure our customers have the best experience in using our road maintenance equipment, we

offer complete services, including product installation, maintenance, repair, operator training, etc.

If you are interested in our products, please contact us directly. We would be happy to serve you.
